

The John Fisher School

**Students With Medical Needs Who
Cannot Attend School Policy**

Responsible: Governors' Resources Committee

Next Review Date: October 2023

*Nurturing young Catholic gentlemen
Aspiring for Academic, Cultural & Sporting Excellence*

Background

- This policy has due regard to all relevant legislation and statutory guidance including, but not limited to, the following:
 - Education Act 1996 - Equality Act 2010
 - Data Protection Act 2018 - DfE (2013) 'Ensuring a good education for students who cannot attend school because of health needs'
 - DfE 'Supporting pupils at school with medical conditions'
- This policy operates in conjunction with the following Trust policies:
 - Attendance Policy
 - Child Protection and Safeguarding Policy
 - Data Protection Policy
 - Records Management Policy
 - Special Educational Needs and Disabilities (SEND) Policy

Local Authority (L.A) Duties

- The L.A must arrange suitable full-time education for students of compulsory school age who, because of illness, would not receive suitable education without such provision.
- The L.A should:
 - Provide such education as soon as it is clear that a student will be away from school for 15 days or more, whether consecutive or cumulative. They should liaise with the appropriate medical professionals to ensure minimal delay in arranging appropriate provision for the student.
 - Ensure the education students receive is of good quality, allows them to take appropriate qualifications, prevents them from falling behind their peers in school, and allows them to reintegrate successfully back into school as soon as possible.
 - Address the needs of individual students in arranging provision.
 - Have a named officer responsible for the education of students with additional health needs and ensure parents/carers know who this is.
 - Have a written, publicly accessible policy statement on their arrangements to comply with their legal duty towards students with additional health needs.
 - Review the provision offered regularly to ensure that it continues to be appropriate for the student and that it is providing suitable education.
 - Give clear policies on the provision of education for students under and over compulsory school age.
- The L.A should not:
 - Have processes or policies in place which prevent a student from getting the right type of provision and a good education.
 - Withhold or reduce the provision, or type of provision, for a student because of how much it will cost.

- Have policies based upon the percentage of time a student is able to attend school rather than whether the student is receiving a suitable education during that attendance.
- Have lists of health conditions which dictate whether or not they will arrange education for students or inflexible policies which result in students going without suitable full-time education (or as much education as their health condition allows them to participate in).

Definitions

- Students who are unable to attend school as a result of their medical needs may include those with:
 - Physical health issues.
 - Physical injuries.
 - Mental health problems, including anxiety issues.
 - Emotional difficulties or school refusal.
 - Progressive conditions.
 - Terminal illnesses.
 - Chronic illnesses.
- Students who are unable to attend mainstream education for health reasons may attend any of the following:
 - Hospital school: a special school within a hospital setting where education is provided to give continuity whilst the child is receiving treatment.
 - Home tuition: many LAs have home tuition services that act as a communication channel between schools and students on occasions where students are too ill to attend school and are receiving specialist medical treatment.
 - Medical PRUs: these are LA establishments that provide education for students unable to attend their registered school due to their medical needs.

Roles and Responsibilities

- Teachers and support staff are responsible for:
 - Understanding confidentiality in respect of students' health needs.
 - Designing lessons and activities in a way that allows those with health needs to participate fully and ensuring students are not excluded from activities that they wish to take part in without a clear evidence-based reason.
 - Understanding their role in supporting students with health needs and ensuring they attend the required training.
 - Ensuring they are aware of the needs of their students through the appropriate and lawful sharing of the individual student's health needs.
 - Ensuring they are aware of the signs, symptoms and triggers of common life-threatening medical conditions and know what to do in an emergency.
 - Keeping parents/carers informed of how their son's health needs are affecting them whilst in the school.

- Parents/carers are expected to:
 - Ensure the regular and punctual attendance of their son at the school where possible.
 - Work in partnership with the school to ensure the best possible outcomes for their child. - Notify the school of the reason for any of their child's absences without delay.
 - Provide the school with sufficient and up-to-date information about their child's medical needs.
 - Attend meetings to discuss how support for their child should be planned.

Managing Absences

- Parents/carers are advised to contact the school on the first day their son is unable to attend due to illness.
- Absences due to illness will be authorised unless the school has genuine cause for concern about the authenticity of the illness.
- The school will provide support to students who are absent from school because of illness for a period of less than 15 school days by liaising with the student's parents/carers to arrange schoolwork as soon as the student is able to cope with it or part-time education at school. The school will give due consideration to which aspects of the curriculum are prioritised in consultation with the student, their family and relevant members of staff.
- For periods of absence that are expected to last for 15 or more school days, either in one absence or over the course of a school year, the named person with responsibility for students with health needs will notify the L.A, who will take responsibility for the student and their education.
- Where absences are anticipated or known in advance, the school will liaise with the L.A to enable education provision to be provided from the start of the student's absence.
- For hospital admissions, the appointed named member of staff will liaise with the L.A regarding the programme that should be followed while the student is in hospital.
- The L.A will set up a personal education plan for the student which will allow the school, the L.A and the provider of the student's education to work together.
- The school will monitor student attendance and mark registers to ensure it is clear whether a student is, or should be, receiving education otherwise than at school.
- The school will only remove a student who is unable to attend school because of additional health needs from the school roll where:
 - The student has been certified by a Medical Officer as unlikely to be in a fit state of health to attend school, before ceasing to be of compulsory school age.

Support

- Where a student has a complex or long-term health issue, the school will discuss the student's needs and how these may be best met with the L.A, relevant medical professionals, parents/carers and, where appropriate, the student.

- The L.A expects the school to support students with health needs to attend full-time education wherever possible, or for the school to make reasonable adjustments to students' programmes of study where medical evidence supports the need for those adjustments.
- The school will make reasonable adjustments under students' individual healthcare plans.
- Students admitted to hospital will receive education as determined appropriate by the medical professionals and hospital tuition team at the hospital concerned.
- During a period of absence, the school will work with the provider of the student's education to establish and maintain regular communication and effective outcomes.
- Whilst a student is away from school, the school will work with the L.A to ensure the student can successfully remain in touch with their school using the following methods:
 - School newsletters
 - Emails - Invitations to school events
 - Cards or letters from peers and staff
- Where appropriate, the school will provide the student's education provider with relevant information, curriculum materials and resources.
- To help ensure a student with additional health needs is able to attend school following an extended period of absence, the following adaptations will be considered:
 - A personalised or part-time timetable, drafted in consultation with the named staff member
 - Access to additional support in school
 - Online access to the curriculum from home
 - Movement of lessons to more accessible rooms
 - Special exam arrangements to manage anxiety or fatigue

Reintegration

- When a student is considered well enough to return to school, the school will develop a tailored reintegration plan in collaboration with the L.A.
- The school will work with the L.A when reintegration into school is anticipated to plan for consistent provision during and after the period of education outside school.
- As far as possible, the student will be able to access the curriculum and materials that they would have used in school.
- If appropriate, the school nurse will be involved in the development of the student's reintegration plan and informed of the timeline of the plan by the appointed named member of staff, to ensure they can prepare to offer any appropriate support to the student.
- The school will consider whether any reasonable adjustments need to be made to provide suitable access to the school and the curriculum for the student.
- For longer absences, the reintegration plan will be developed near to the student's likely date of return, to avoid putting unnecessary pressure on an ill student or their parents/carers in the early stages of their absence.

- The school is aware that some students will need gradual reintegration over a long period of time and will always consult with the student, their parents/carers and key staff about concerns, medical issues, timing and the preferred pace of return.
- The reintegration plan will include:
 - The date for planned reintegration, once known.
 - Details of regular meetings to discuss reintegration.
 - Details of the named member of staff who has responsibility for the student.
 - Clearly stated responsibilities and the rights of all those involved.
 - Details of social contacts, including the involvement of peers and mentors during the transition period.

Information Sharing

- It is essential that all information about students with health needs is kept up-to-date.
- To protect confidentiality, all information-sharing techniques, e.g. staff noticeboards, will be agreed with the student and their parent/carer in advance of being used.
- All teachers, TAs, supply and support staff will be provided with access to relevant information, including high-risk health needs, first aiders and emergency procedures, via the agreed school procedures.
- Parents/carers will be made aware of their own rights and responsibilities regarding confidentiality and information sharing. To help achieve this, the school will:
 - Ensure this policy and other relevant policies are easily available and accessible.
 - Provide the student and their parents/carers with a copy of the policy on information sharing.
 - Ask parents/carers to sign a consent form which clearly details the organisations and individuals that their child's health information will be shared with and which methods of sharing will be used.
 - Consider how friendship groups and peers may be able to assist students with health needs.
- When a student is discharged from hospital or is returning from other education provision, the school will ensure the appropriate information is received to allow for a smooth return to the school. The named member of staff will liaise with the hospital or other tuition service as appropriate.

Record Keeping

- Records will be kept of all medicines administered to students.
- Proper record keeping protects both staff and students and provides evidence that agreed procedures have been followed.
- All records will be maintained in line with the Records Management Policy.

Training

- Staff will be trained in a timely manner to assist with a student's return to school.
- Once a student's return date has been confirmed, staff will be provided with relevant training before the student's anticipated return.
- Healthcare professionals should be involved in identifying and agreeing with the school the type and level of training required.
- Training will be sufficient to ensure staff are confident in their ability to support students with additional health needs.
- Parents/carers of students with additional health needs may provide specific advice but will not be the sole trainer of staff.

Examinations & Assessments

- The named member of staff will liaise with the alternative provision provider over planning and examination course requirements where appropriate.
- Relevant assessment information will be provided to the alternative provision provider if required.
- Awarding bodies may make special arrangements for students with permanent or long-term disabilities and learning difficulties, or temporary disabilities and illnesses. Applications for such arrangements will be submitted by the school, or L.A if more appropriate, as early as possible.
