

Curriculum Intent

With Christ at the centre of our school, we aim to create opportunities that will enable all students to fulfil their God-given potential through an engaging curriculum that includes social, academic, spiritual, sporting and cultural experiences.

The John Fisher School is committed to providing a curriculum that is broad, balanced and challenging, and which fosters a love of learning. We match our curriculum to the abilities, interests and aspirations of our students, to give every child the opportunity to strive for personal excellence. We are an academic school that aims to open doors for every student, and we therefore value, alongside traditional subjects, the contribution that creative, practical and vocational learning brings to a child's development. Our aspiration is that every learner who leaves The John Fisher School is a Catholic gentleman with the qualifications, skills, knowledge and character to lead a courageous life and the positive relationships, resilience and financial independence to flourish in the modern world.
